PROFESSIONAL SUMMARY

Director of Data & Technology with hands-on responsibility for production MySQL, AWS infrastructure, Linux operations, Python automation, data analysis, compliance, and full-stack data products. Leads analyst-developers and cross-functional programs spanning AI, internal applications, and large-scale audience systems. Combines technical depth, people leadership, and clear communication to turn complex data into reliable systems and practical business decisions.

Scope: 110M+ core consumer profiles | 2 analyst-developers | 4-person management team | 3 major technical programs | CCPA + ISO leadership

TECHNICAL SKILLS

Data & Analytics: MySQL, SQL, Python, R, Power BI, Excel, data analysis, modeling, scoring, QA, geospatial analysis

Cloud & Systems: AWS EC2, S3, CloudWatch, CloudTrail, Linux/Ubuntu, Bash, cron, Termius, backup, archiving, recovery

Development: JavaScript, React, Vue.js, Next.js, PHP, Retool, MERN, HTML5, CSS3, Tailwind, Sass, REST APIs

Leadership & Compliance: People management, technical strategy, cross-functional delivery, CCPA operations, ISO controls and audits

PROFESSIONAL EXPERIENCE

Source Path Digital — Director of Data & Technology |

Apr 2024–Present

Promoted from Data Manager

- Lead two analyst-developers and serve on a four-person management team; set priorities across data analysis, front-end development, automation, AI implementation, and internal systems.
- Own major programs spanning company-wide AI tools, an internal operations application, and an external audience-counts platform.
- Administer production MySQL and AWS infrastructure, including Linux operations, performance tuning, monitoring, storage, archiving, backup, and recovery.
- Design Python automation and MySQL procedures for high-volume processing, scoring, QA, deployments, reporting, and repeatable operational work.
- Lead technical CCPA removal operations and ISO control documentation; support evidence collection and internal and external audits.
- Perform client, internal, external-request, and public-data analysis; investigate anomalies and communicate findings to technical and nontechnical stakeholders.

Earlier Experience

Global Brew Taphouse — Management

2021–2024

Old Herald Brewery & Distillery — Brewery Operations

2020–2021

Wang Gang Asian — Bar Program Management

2013–2020

SELECTED TECHNICAL PROJECTS

Vehicle Intender Prediction System — Built an explainable MySQL scoring and ranking workflow that combines ownership, demographic, geographic, and market signals to recommend likely vehicle interests across a production-scale data environment.

[MySQL, Stored Procedures, Python, AWS, Data Modeling]

Front-End Audience Counts System — Led a React/PHP data product using precomputed bitmap data to return rapid audience counts across thousands of selectable attributes; automated recurring preparation and deployment with Python and Linux. *[React, JavaScript, PHP, MySQL, Python, Linux]*

AWS Data Lifecycle & Recovery — Manage EC2-hosted database infrastructure and designed S3 archiving, duplicate-instance, monitoring, backup, and recovery workflows to improve retention and operational continuity. *[AWS EC2, S3, CloudWatch, MySQL, Linux]*

Political & Public Affairs Model — Developed a versioned MySQL/Python scoring framework combining licensed persona data with demographic context to produce explainable engagement, donor, nonprofit, and public-affairs audience outputs. *[MySQL, Python, Data Analysis, Scoring Models, QA]*

[MySQL, Python, Data Analysis, Scoring Models, QA]

EDUCATION & TRAINING

B.A., Political Science — Southern Illinois University Edwardsville

Certificate, Full-Stack Web Development — Washington University in St. Louis

Additional Training: Data Analysis with Python Certificate; AWS Cloud Practitioner Essentials — Fundamentals
